Re: *Approval of the Amendment to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. and Broadband Office Communications, Inc. Pursuant to Sections 251 and 252 of the Telecommunications Act of 1996.*

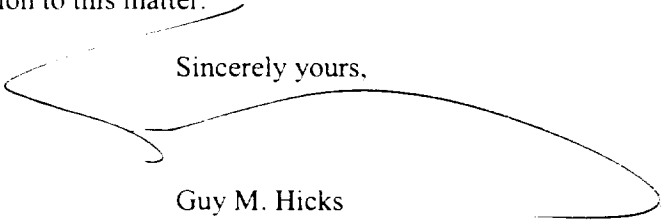

Docket No. ~~00-00485~~
01-00076

Dear Mr. Waddell:

Pursuant to Section 252(e) of the Telecommunications Act of 1996, Broadband Office Communications, Inc. and BellSouth Telecommunications, Inc. are hereby submitting to the Tennessee Regulatory Authority the original and thirteen copies of the attached Petition for Approval of the Amendment to the Interconnection Agreement dated April 1, 2000. The Amendment adds Tennessee rates for line sharing and other services.

Thank you for your attention to this matter.

Sincerely yours,

Guy M. Hicks

cc: Mr. Woody Traylor, Vice President Regulatory Affairs and Secretary, Broadband Office Communications, Inc.

BEFORE THE TENNESSEE REGULATORY AUTHORITY
Nashville, Tennessee

In re: *Approval of the Amendment to the Interconnection Agreement Negotiated by BellSouth Telecommunications, Inc. and Broadband Office Communications, Inc. Pursuant to Sections 251 and 252 of the Telecommunications Act of 1996*

Docket No. ~~00-00485~~
01-00076

**PETITION FOR APPROVAL OF THE
AMENDMENT TO THE INTERCONNECTION AGREEMENT
NEGOTIATED BETWEEN BELL SOUTH TELECOMMUNICATIONS, INC.
AND BROADBAND OFFICE COMMUNICATIONS, INC.
PURSUANT TO THE TELECOMMUNICATIONS ACT OF 1996**

COME NOW, Broadband Office Communications, Inc. ("Broadband") and BellSouth Telecommunications, Inc., ("BellSouth"), and file this request for approval of the Amendment to the Interconnection Agreement dated April 1, 2000 (the "Amendment") negotiated between the two companies pursuant to Sections 251 and 252 of the Telecommunications Act of 1996, (the "Act"). In support of their request, Broadband and BellSouth state the following:

1. Broadband and BellSouth have successfully negotiated an agreement for interconnection of their networks, the unbundling of specific network elements offered by BellSouth and the resale of BellSouth's telecommunications services to Broadband. The Interconnection Agreement was approved by the Tennessee Regulatory Authority ("TRA") on August 15, 2000.

2. The parties have recently negotiated an Amendment to the Agreement which adds Tennessee rates for line sharing and other services. A copy of the Amendment is attached hereto and incorporated herein by reference.

3. Pursuant to Section 252(e) of the Telecommunications Act of 1996, Broadband and BellSouth are submitting their Amendment to the TRA for its consideration and approval. The Amendment provides that either or both of the parties is authorized to submit this Amendment to the TRA for approval.

4. In accordance with Section 252(e) of the Act, the TRA is charged with approving or rejecting the negotiated Amendment between BellSouth and Broadband within 90 days of its submission. The Act provides that the TRA may only reject such an agreement if it finds that the agreement or any portion of the agreement discriminates against a telecommunications carrier not a party to the agreement or the implementation of the agreement or any portion of the agreement is not consistent with the public interest, convenience and necessity.

5. Broadband and BellSouth aver that the Amendment is consistent with the standards for approval.

6. Pursuant to Section 252(i) of the Act, BellSouth shall make the Agreement available upon the same terms and conditions contained therein.

Broadband and BellSouth respectfully request that the TRA approve the Amendment negotiated between the parties.

This 19 day of June, 2001.

Respectfully submitted,

BELLSOUTH TELECOMMUNICATIONS, INC.

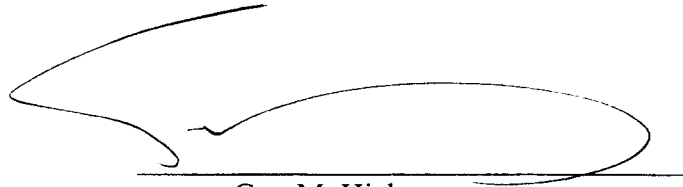

By: 

Guy M. Hicks

Attorney for BellSouth

CERTIFICATE OF SERVICE

I, Guy M. Hicks, hereby certify that I have served a copy of the foregoing Petition for Approval of the Amendment to the Interconnection Agreement on the following via United States Mail:

Mr. Woody Traylor
Vice President Regulatory Affairs and Secretary
Broadband Office Communications, Inc.
2900 Telestar Court, Second Floor
Falls, Church, VA 22042-1206

A handwritten signature in black ink, consisting of a large, stylized 'G' followed by 'uy M. Hicks'.

Guy M. Hicks

AMENDMENT TO
INTERCONNECTION AGREEMENT BETWEEN
BELLSOUTH TELECOMMUNICATIONS, INC.
AND BROADBAND OFFICE COMMUNICATIONS, INC.
DATED APRIL 1, 2000

Pursuant to this Agreement (the "Amendment"), BellSouth Telecommunications, Inc. ("BellSouth") and BroadBand Office Communications, Inc. ("BBOC") hereinafter referred to collectively as the "Parties", hereby agree to amend that certain Interconnection Agreement between the Parties dated April 1, 2000 ("Interconnection Agreement").

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, BellSouth and BBOC hereby covenant and agree as follows:

1. Attachment 2 of the Agreement is hereby amended to include a new Section 2.10 and all its subsections for the state of Tennessee as follows:

2.10 Preordering Loop Makeup (LMU)

2.10.1 Description of Service

2.10.1.1 BellSouth shall make available to BBOC loop makeup (LMU) data for BellSouth's network facilities. This section addresses LMU as a *preordering* transaction, distinct from BBOC ordering any other service(s). Loop Makeup *Service Inquiries (LMUSI) for preordering loop makeup* are likewise unique from other preordering functions with associated service inquiries (SI) as described in this Agreement.

2.10.1.2 BellSouth will provide BBOC with loop makeup information consisting of the composition of the loop material (copper/fiber); the existence, location and type of equipment on the loop, including but not limited to digital loop carrier or other remote concentration devices, feeder/distribution interfaces, bridge taps, load coils, pair-gain devices; the loop length; and the wire gauge. The LMUSI may be utilized by BBOC for the purpose of determining whether the loop requested is capable of supporting DSL service or other advanced data services. The determination shall be made solely by BBOC and BellSouth shall not be liable in any way for the performance of the advanced data services provisioned over said loop.

2.10.1.3 BellSouth's LMU information is provided to BBOC as it exists either in BellSouth's databases or in its hard copy facility records. BellSouth does not guarantee accuracy or reliability of the LMU information provided.

2.10.1.4 BellSouth offers LMU information for the sole purpose of allowing BBOC to determine whether, in BBOC's judgment, BellSouth's loops will support the specific services that BBOC wishes to provide over those loops.

BBOC may choose to use equipment that it deems will enable it to provide a certain type and level of service over a particular BellSouth loop; however, such configurations may not match BellSouth's or the industry's standards and specifications for the intended type and level of service. Accordingly, BBOC shall be responsible for insuring that the specific loop type (ADSL, HDSL, or otherwise) ordered on the LSR matches the LMU of the facility requested. BBOC bears full responsibility for being knowledgeable of BellSouth's technical standards and the specifications of BellSouth's loops. BBOC bears full responsibility for making the appropriate ordering decisions of matching BellSouth loops with BBOC's equipment for accomplishing BBOC's end goal for the intended service it wishes to provide its end-user(s). BBOC is fully responsible for any of its service configurations that may differ from BellSouth's technical standard for the loop type ordered.

2.10.2 Submitting Loop Makeup Service Inquiries

2.10.2.1 BBOC will be able to obtain LMU information by submitting a LMUSI mechanically or manually. **Mechanized** LMUSIs should be submitted through BellSouth's Operational Support Systems interfaces. After obtaining the resulting loop data from the mechanized LMUSI process, if BBOC determines that it needs further loop data information in order to make a determination of loop service capability, BBOC may initiate a separate manual SI for a separate nonrecurring charge as set forth in Section 2.10.3. Mechanized LMU has been made available for limited deployment to those CLECs that have effective X-Digital Subscriber Line (xDSL) Beta Test Agreements in place with BellSouth. CLECs will be notified once a successful Beta Test has been completed, and mechanized LMU shall then be available to BBOC.

2.10.2.2 **Manual** LMUSIs shall be submitted on the preordering manual LMUSI form by means of fax or electronic-mail to BellSouth's Complex Resale Support Group (CRSG)/Account Team utilizing the Preordering Loop Makeup Service Inquiry form. The standard service interval for the return of a Loop Makeup Manual Service Inquiry is seven business days. This service interval is distinct from the interval applied to the subsequent service order. Manual LMUSIs are not subject to expedite requests.

2.10.3 LMUSI Types and Associated Charges

2.10.3.1 BBOC may request LMU information by submitting LMUSIs in accordance with the rate elements in Exhibit 1-TN.

2.10.3.2 BBOC will be assessed a nonrecurring charge for each facility queried as specified in Exhibit 1-TN. Rates for Tennessee are interim and subject to true-up pending approval of final rates by the respective State Commission. True-ups will be retroactive to the effective date of this Agreement.

- 2.10.3.3 BBOC may reserve facilities for up to four (4) days in connection with a LMUSI. Reserved facilities for which BBOC does not plan to place a UNE local service request (LSR) should be cancelled by BBOC. Should BBOC wish to cancel a reservation on a spare facility, the cancellation will require a facility reservation number (RESID/FRN).
- 2.10.3.4 The reservation holding timeframe is a maximum of four days from the time that BellSouth's LMU data is returned to BBOC for the facility queried. During this holding time and prior to BBOC's placing an LSR, the reserved facilities are rendered unavailable to other customers, whether for CLEC(s) or for BellSouth. Notwithstanding the foregoing, BellSouth does not guarantee that a reservation will assure BBOC's ability to order the exact facility reserved.
- 2.10.3.5 If BBOC does not submit an LSR for a UNE service on a reserved facility within the four-day reservation timeframe, the reservation of that spare facility will become invalid and the facility will be released.
- 2.10.3.6 Charges for preordering LMUSI are separate from any charges associated with ordering other services from BellSouth.
- 2.10.4 Ordering of Other UNE Services
- 2.10.4.1 Whenever BBOC has reserved a facility through BellSouth's preordering LMU service, should BBOC seek to place a subsequent UNE LSR on a reserved facility, BBOC shall provide BellSouth the RESID/FRN of the single spare facility on the appropriate UNE LSR., BBOC will be billed the appropriate rate element for the specific type UNE loop ordered by BBOC as set forth in this Attachment. BBOC will not be billed any additional Loop Makeup charges for the loop so ordered. Should BBOC choose to place a UNE LSR having previously submitted a request for *preordering LMU without a reservation*, BBOC will be billed the appropriate rate element for the specific UNE loop ordered as well as additional Loop Makeup charges as set forth in this Attachment. Rates are provided in Exhibit 1-TN in this Attachment.
- 2.10.4.2 Where BBOC submits an LSR to order facilities reserved during the LMUSI process, BellSouth will use its best efforts to assign to BBOC the facility reserved as indicated on the return of the LMU. Multi-facility reservations per single RESID/FRN as provided with the mechanized LMUSI process are less likely to result in the specific assignment requested by BBOC. For those occasions when BellSouth cannot assign the specific facility reserved by BBOC during the LMU pre-ordering transaction, due to incomplete or incorrect information provided by BBOC during the ordering process, BellSouth will assign to BBOC, subject to availability, a facility that meets the BellSouth technical standards of the BellSouth type loop as ordered by BBOC. If the ordered loop type is not available, BBOC may utilize the Unbundled Loop Modification process or

the Special Construction process, as applicable, to obtain the loop type ordered.

2. Attachment 2 of the Agreement is hereby amended to include a new section 14.0 and all its subsections for the state of Tennessee as follows:

14.0 High Frequency Spectrum Network Element

14.1 General

14.1.1 BellSouth shall provide BBOC access to the high frequency portion of the local loop as an unbundled network element only where BellSouth is the voice service provider to the end user ("High Frequency Spectrum") at the rates set forth in Exhibit 1-TN. BellSouth shall provide BBOC with the High Frequency Spectrum irrespective of whether BellSouth chooses to offer xDSL services on the loop.

14.1.2 The High Frequency Spectrum is defined as the frequency range above the voiceband on a copper loop facility carrying analog circuit-switched voiceband transmissions. Access to the High Frequency Spectrum is intended to allow BBOC the ability to provide Digital Subscriber Line ("xDSL") data services to the end user for which BellSouth provides voice services. The High Frequency Spectrum shall be available for any version of xDSL presumed acceptable for deployment pursuant to 47 CFR Section 51.230, including, but not limited to, ADSL, HDSL, and any other xDSL technology that is presumed to be acceptable for deployment pursuant to FCC rules. BellSouth will continue to have access to the low frequency portion of the loop spectrum (from 300 Hertz to at least 3000 Hertz, and potentially up to 3400 Hertz, depending on equipment and facilities) for the purposes of providing voice service. BBOC shall only use xDSL technology that is within the PSD mask parameters set forth in T1.413 or other applicable industry standards. BBOC shall provision xDSL service on the High Frequency Spectrum in accordance with the applicable Technical Specifications and Standards.

14.1.3 The following loop requirements are necessary for BBOC to be able to access the High Frequency Spectrum: an unconditioned, 2-wire copper loop. An unconditioned loop is a copper loop with no load coils, low-pass filters, range extenders, DAMLs, or similar devices and minimal bridged taps consistent with ANSI T1.413 and T1.601. BellSouth will provide BBOC access to the Unbundled Loop Modification (Line Conditioning), in accordance with Section 2.2 of the Interconnection Agreement. BellSouth is not required to condition a loop for access to the high frequency spectrum if conditioning of that loop significantly degrades BellSouth's voice service. If BBOC requests that BellSouth condition a loop longer than 18,000 ft. and such conditioning significantly degrades

the voice services on the loop, BBOC shall pay for the loop to be restored to its original state.

14.1.4 BBOC's termination point is the point of termination for BBOC on the toll main distributing frame in the central office ("Termination Point"). BellSouth will use jumpers to connect BBOC's connecting block to the splitter. The splitter will route the High Frequency Spectrum on the circuit to BBOC's xDSL equipment in BBOC's collocation space.

14.1.5 BBOC shall have access to the splitter for test purposes, irrespective of where the splitter is placed in the BellSouth premises.

14.2 **Provisioning of High Frequency Spectrum and Splitter Space**

14.2.1 BellSouth will provide BBOC with access to the High Frequency Spectrum as follows:

14.2.1.1 BellSouth will install splitters within forty-two (42) calendar days of BBOC's submission of such order to the BellSouth Complex Resale Support Group; provided, however, that in the event BellSouth did not have reasonable notice that a particular central office was to have a splitter installed therein, the forty-two (42) day interval shall not apply. Collocation itself or an application for collocation will serve as reasonable notice.

14.2.1.2 Once a splitter is installed on behalf of BBOC in a central office, BBOC shall be entitled to order the High Frequency Spectrum on lines served out of that central office.

14.2.1.2.1 BellSouth will bill and BBOC shall pay the SOMAN and SOMECH charges as described in this Agreement when BBOC orders High Frequency Spectrum for end-user service.

14.2.1.3 BellSouth will select, purchase, install, and maintain a central office POTS splitter and provide BBOC access to data ports on the splitter. At least 30 days before making a change in splitter suppliers, BellSouth will provide BBOC with a carrier notification letter, informing BBOC of change. BBOC shall purchase ports on the splitter as set forth more fully below.

14.2.1.4 BellSouth will install the splitter in (i) a common area close to the BBOC collocation area, if possible; or (ii) in a BellSouth relay rack as close to the BBOC DS0 termination point as possible. For purposes of this section, a common area is defined as an area in the central office in which both Parties have access to a common test access point. BellSouth will cross-connect the splitter data ports to a specified BBOC DS0 at such time that a BBOC end user's service is established.

14.2.1.5 The High Frequency Spectrum shall only be available on loops on which BellSouth is also providing, and continues to provide, analog voice service

directly to the end user. In the event the end-user terminates its BellSouth provided voice service for any reason, and BBOC desires to continue providing xDSL service on such loop, BBOC shall be required to purchase a full stand-alone loop unbundled network element. In the event BellSouth disconnects the end-user's voice service pursuant to its tariffs or applicable law, and BBOC desires to continue providing xDSL service on such loop, BBOC shall be permitted to continue using the line by purchasing the full stand-alone loop unbundled network element. To the extent commercially practicable, BellSouth shall give BBOC notice in a reasonable time prior to disconnect, which notice shall give BBOC an adequate opportunity to notify BellSouth of its intent to purchase such loop. In those cases in which BellSouth no longer provides voice service to the end user and BBOC purchases the full stand-alone loop, BBOC may elect the type of loop it will purchase. BBOC will pay the appropriate recurring and non-recurring rates for such loop as set forth in Exhibit 1-TN to this Attachment. In the event BBOC purchases a voice grade loop, BBOC acknowledges that such loop may not remain xDSL compatible.

- 14.2.1.6 Only one competitive local exchange carrier shall be permitted access to the High Frequency Spectrum of any particular loop.
- 14.2.2 Ordering
 - 14.2.2.1 To order High Frequency Spectrum on a particular loop, BBOC must have a DSLAM collocated in the central office that serves the end-user of such loop. BBOC may order splitters in a central office once it has installed its Digital Subscriber Line Access Multiplexer ("DSLAM") in that central office. BellSouth will install these splitters within the interval provided in paragraph 14.2.1.1.
 - 14.2.2.2 BellSouth will devise a splitter order form that allows BBOC to order splitter ports in increments of 24 ports.
 - 14.2.2.2.1 BellSouth will provide BBOC the Local Service Request ("LSR") format to be used when ordering the High Frequency Spectrum.
 - 14.2.2.3 BellSouth will provide access to the High Frequency Spectrum within the following target intervals: BellSouth will return a manual Firm Order Confirmation ("FOC") in no more than two (2) business days after receipt of a valid, error free manual LSR. When BBOC submits an electronic LSR for High Frequency Spectrum, BellSouth will return a FOC in four (4) hours ninety-five percent (95%) of the time, or, for orders that do not flow-through, in two (2) business days. BellSouth will provide BBOC with access to the High Frequency Spectrum at the following target intervals:
 - 14.2.2.3.1 For 1-5 lines at the same address within three (3) business days from BellSouth's issuance of a FOC; 6-10 lines at same address within 5

business days from BellSouth's issuance of a FOC; and more than 10 lines at the same address is to be negotiated.

14.2.2.4 BellSouth will provide to BBOC BellSouth's Loop Qualification System that BellSouth uses to qualify loops for its own ADSL offering as described below.

14.2.2.5 BellSouth will provide BBOC access to the Preordering Loop Makeup (LMU), in accordance with Section 2.10 of the Interconnection Agreement. BellSouth shall bill and BBOC shall pay the rates for such services, as described in Exhibit 1-TN.

14.2.3 **Maintenance and Repair**

14.2.3.1 BBOC shall have access, for test, repair, and maintenance purposes, to any loop as to which it has access to the High Frequency Spectrum. BBOC may access the loop at the point where the combined voice and data signal exits the central office splitter.

14.2.3.1.1 BellSouth will be responsible for repairing voice services and the physical line between the network interface device at the customer's premises and the Termination Point of demarcation in the central office. BBOC will be responsible for repairing data services. Each Party will be responsible for maintaining its own equipment.

14.2.3.1.2 BBOC shall inform its end users to direct data problems to BBOC, unless both voice and data services are impaired, in which event the end users should call BellSouth.

14.2.3.1.3 Once a Party has isolated a trouble to the other Party's portion of the loop, the Party isolating the trouble shall notify the end user that the trouble is on the other Party's portion of the loop.

14.2.3.1.4 In the event BBOC's deployment of xDSL on the High Frequency Spectrum significantly degrades the performance of other advanced services or of BellSouth's voice service on the same loop, BellSouth shall notify BBOC and allow twenty-four (24) hours to cure the trouble. If BBOC fails to resolve the trouble, BellSouth may discontinue BBOC's access to the High Frequency Spectrum on such loop.

3. Pursuant to Exhibit C of Attachment 2 of the Interconnection Agreement, the Parties hereby agree to add the rates for Unbundled Network Element Line Sharing and revise the rates for Unbundled Loop Modification/Conditioning and Loop Make Up for the state of Tennessee as set forth in Exhibit 1-TN. Based on the results of the Tennessee Regulatory Authority (TRA) hearing on September 26, 2000 in Docket No. 00-00544 the interim rates for Line Sharing, Unbundled Loop Modification/Conditioning and Loop Make Up in Tennessee shall be as set

forth in Exhibit 1-TN. These rates shall be subject to retroactive true-up once permanent rates have been established by the Authority.

4. The Parties agree that the rates for Tennessee in Exhibit C of Attachment 2 of the Interconnection Agreement that are associated with the following rate elements are hereby deleted and replaced with new rates for like elements hereto attached as Exhibit 1-TN.

5. The Parties agree that the rates for Tennessee in Exhibit C of Attachment 2 of the Interconnection Agreement are hereby amended to include the new rate elements found in Exhibit 1-TN hereto attached.

6. The Parties agree that all of the other provisions of the Interconnection Agreement, dated April 1, 2000, shall remain in full force and effect.

7. The Parties further agree that either or both of the Parties is authorized to submit this Amendment to the Tennessee Regulatory Authority or other regulatory body having jurisdiction over the subject matter of this Amendment, for approval subject to Section 252(e) of the federal Telecommunications Act of 1996.

IN WITNESS WHEREOF, the Parties hereto have caused this Amendment to be executed by their respective duly authorized representatives on the date indicated below.

	** Interim Rates subject to true-up		
Note:			
	The recurring interim and nonrecurring interim rates in TN for 2-Wire analog VG (SL1) for Line Sharing is for a stand-alone loop purchased by BBOC to provide both analog voice service and xDSL services or in the event BBOC wishes to continue providing xDSL services to an end-user who terminates its BellSouth-provided voice service. These rates apply when BBOC purchases the splitter from BellSouth.
